

Supplementary Table: Means and beta-coefficients (95% CI) from multivariate analyses of seeking care, asking for and trusting health information for first contact practitioners, medical practitioners and other sources. Only significant univariate associations were included in the multivariate model. Income is reported as Australian dollars (AU\$).

Variable	Number of responses	Seek care from			Asking/sourcing health information ^a			Trusting health information ^a		
		Mean (95% CI) /5	Beta (95% CI)	Sig	Mean (95% CI) /5	Beta (95% CI)	Sig	Mean (95% CI) /5	Beta (95% CI)	Sig
