

External validation of the ProVent score for prognostication of 1-year mortality of critically ill patients with prolonged mechanical ventilation: a retrospective observational study

Additional File 2: Regression coefficients of the original ProVent probability model, the recalibrated model and the extended model.

Term	Original model	Recalibrated model	Extended Model
	β	β	β
Intercept	-1.7401	-1.7580	-0.7860
Age	0.0435	0.0435	0.0435
Platelet count	-0.0036	-0.0036	-0.0036
Pressor	1.0835	0.6572	0.6572
Renal replacement therapy	0.9250	0.1142	0.1142
Total Bilirubin			0.1248
Any Surgery			-0.5701
Enteral Nutrition			-0.9366
