n/a: Results not available because the items (C1, E7, F5, E10, E11) had been excluded from the analysis, since they were irrelevant for a large proportion of respondents, reducing the data substantial.

*The item loaded on two factors. The final placement of the item in the factor 'organisation' was primarily based on theoretical considerations and an overall picture including separate analysis of the dimensions.

**When included in the analysis, consideration of comorbidity was clearly an independent factor.

Item A1, B6, D6, E1, E8, E9 and F1 were excluded from the analysis, because they did not load substantially on any factors.
