Abbreviations: aHR, adjusted hazard ratio; cHR, crude hazard ratio; CI, confidence interval; CKD, chronic kidney disease; PY, person-years.

[*]Incidence rate, per 1000 person-years.

[†]Model 1: crude model.

[‡]Model 2: adjusted for propensity score.

[§]Model 3: adjusted for all variables listed in Table 1.

[¶]Model 4: adjusted for all variables listed in Table 1, where medications were considered time-dependent covariates.
