

## **A scoping review of the policy environment impacting alcohol related societal harm in India**

**List of authors:** Jaclyn Schess, Abhijeet Jambhale, Urvita Bhatia, Richard Velleman, Abhijit Nadkarni

**Table 1: Inclusion and exclusion criteria for initial search**

	<b>Included</b>	<b>Excluded</b>
<b>Year</b>	Any	
<b>Language</b>	English	
<b>Population</b>	Any	
<b>Setting</b>	India and any states or UTs of India	

### **Databases:**

- 1) Medline
- 2) EMBASE
- 3) PsycINFO
- 4) Global Health

**Table 2: Search concepts**

<b>Alcohol</b>	<b>Policy and alcohol related policy terms</b>	<b>India</b>
Alcohol	Policy	India
Substance	Scheme	Individual Indian states
Addiction	De-addiction	
Drinking	Treatment	
Alcoholism	Plan	
Alcohol use disorder	Marketing	
Drink driving	Liberalization	
Liquor	Lobbying	

Blood Alcohol Content	Demand	
Beverage	Prevention	
Bar/Pub	Promotion	
Unhealthy commodity	Point of sale	
	Supply	
	Government	
	Ministry	
	Detoxification	
	Prohibition	
	Tax	
	Management	
	Regulation	
	Act	
	Program	
	Law	
	Legal	
	Legal drinking age	
	Dry Day

	Legislation	
	Advertising	
	Enforcement	

	Restriction	
	Trade	
	Importation	
	Illicit	
	Synthetic	
	Pricing	
	Limits	
	Open Container	
	Revenue	
	Industry	
	Agreement	
	Control	
	Treaty	
	Labeling	
	Reduction	
	Packaging	
	Distribution	

## **Data collection and analysis**

### **Selection of studies and guidelines**

Two reviewers will independently inspect the abstracts of the studies identified through the academic search strategy described below: two lists will then be composed of potentially eligible studies. The two reviewers will then discuss their selections and in the case of any disagreement regarding inclusion, a third reviewer will be consulted for a final decision.

### **Data extraction**

Following Preferred Reporting Items for Systematic Reviews and Meta-Analyses (PRISMA) guidelines, a record will be made of the number of papers retrieved, the number of papers excluded and the reasons for their exclusion. A formal data

extraction form will be designed for the papers to extract data relevant to the study aims. Two reviewers will independently perform data collection and any disagreements will be discussed and resolved.
