PRISMA-P (Preferred Reporting Items for Systematic review and Meta-Analysis Protocols) 2015 checklist: recommended items to address in a systematic review protocol* -- Equity and intrapartum care by skilled birth attendant globally: protocol for a systematic review

Section and topic	Ite m No	1	Page number
Title:			
Identification	1a	Identify the report as a protocol of a systematic review	1
Update	1b	If the protocol is for an update of a previous systematic review, identify as such	N/A
Registration		If registered, provide the name of the registry (such as PROSPERO) and registration number	
Authors:			5
Contact	3a	Provide name, institutional affiliation, e-mail address of all protocol authors; provide physical mailing address of corresponding author	1
Contributions		Describe contributions of protocol authors and identify the guarantor of the review	1
Amendments	4	If the protocol represents an amendment of a previously completed or published protocol, identify as such and list changes; otherwise, state plan for documenting important protocol amendments	N/A
Support:			
Sources	5a	Indicate sources of financial or other support for the review	10
Sponsor	5b	Provide name for the review funder and/or sponsor	10
Role of sponsor or funder	5c	Describe roles of funder(s), sponsor(s), and/or institution(s), if any, in developing the protocol	1, 10
		INTRODUCTION	
Rationale	6	Describe the rationale for the review in the context of what is already known	4
Objectives	7	Provide an explicit statement of the question(s) the review will address with reference to participants, interventions, comparators, and outcomes (PICO)	5-7
		METHODS	
Eligibility	8	Specify the study characteristics (such as PICO, study design, setting, time frame) and report characteristics (such as years	5-7

criteria	considered, language, publication status) to be used as criteria for eligibility for the review	
Information sources	9 Describe all intended information sources (such as electronic databases, contact with study authors, trial registers or other grey literature sources) with planned dates of coverage	7-8
Search strategy	10 Present draft of search strategy to be used for at least one electronic database, including planned limits, such that it could be repeated	See Supplementary File 3
Study records:		
Data management	11a Describe the mechanism(s) that will be used to manage records and data throughout the review	8
Selection process	11b State the process that will be used for selecting studies (such as two independent reviewers) through each phase of the review (tis, screening, eligibility and inclusion in meta-analysis)	hat 8
Data collection process	11c Describe planned method of extracting data from reports (such as piloting forms, done independently, in duplicate), any proces for obtaining and confirming data from investigators	ses 8 See Supplementary File 4
Data items	12 List and define all variables for which data will be sought (such as PICO items, funding sources), any pre-planned data assumptions and simplifications	See Supplementary File 4
Outcomes and prioritization	13 List and define all outcomes for which data will be sought, including prioritization of main and additional outcomes, with rationale	9 See Supplementary File 4
Risk of bias in individual studies	Describe anticipated methods for assessing risk of bias of individual studies, including whether this will be done at the outcome study level, or both; state how this information will be used in data synthesis	e or 8 See Supplementary File 4
Data synthesis	15a Describe criteria under which study data will be quantitatively synthesised	N/A (not a meta- analysis)
	15b If data are appropriate for quantitative synthesis, describe planned summary measures, methods of handling data and methods combining data from studies, including any planned exploration of consistency (such as I², Kendall's τ)	of N/A (not a meta- analysis)
	15c Describe any proposed additional analyses (such as sensitivity or subgroup analyses, meta-regression)	9
	15d If quantitative synthesis is not appropriate, describe the type of summary planned	
Meta-bias(es)	16 Specify any planned assessment of meta-bias(es) (such as publication bias across studies, selective reporting within studies)	8
Confidence in cumulative evidence	17 Describe how the strength of the body of evidence will be assessed (such as GRADE)	N/A

^{*}It is strongly recommended that this checklist be read in conjunction with the PRISMA-P Explanation and Elaboration (cite when available) for important clarification on the items. Amendments to a review protocol should be tracked and dated.
