

## Supplementary materials

### Supplementary tables

**Supplementary table 1:** ICD-10 codes for AMI identified in HES

**Supplementary table 2:** CALIBER definition of AMI subtypes (STEMI, NSTEMI) using MINAP data.

**Supplementary table 3:** Variables used to define death in-hospital and post-AMI discharge.

**Supplementary table 4:** Details on data sources for covariates.

**Supplementary table 5:** AMI database capture by CKD status (binary) stratified by AMI subtype (STEMI or NSTEMI)

**Supplementary table 6:** Serum creatinine (SCr) measured in the first 24 hours of AMI hospitalization recorded in MINAP, stratified by CKD stage defined in primary care (NCKDA)

**Supplementary table 7:** AMI hospitalisations occurring before study start – description of people in the NCKDA who experienced AMI hospitalisation recorded in MINAP or HES before the study start. n (column %) unless specified otherwise.

**Supplementary table 8:** AMI hospitalisations occurring before study start - multinomial logistic regression comparing the relative risk ratios (RRR) of AMI recording across HES and MINAP according to CKD stage. The comparator outcome is people with AMI recorded in both HES and MINAP databases.

**Supplementary table 9:** AMI hospitalisations occurring before study start - agreement between primary care-derived CKD stage (NCKDA) and secondary care-derived CKD stage (MINAP)

**Supplementary table 10:** Multinomial logistic regression comparing the relative risk ratios (RRR) of AMI recording across HES and MINAP according to CKD stage, after excluding those with a history of dialysis. The comparator outcome is people with AMI recorded in both HES and MINAP databases.

**Supplementary table 11:** Death during and after first AMI hospitalisation in study population at risk of or with CKD, excluding those with a history of dialysis.

**Supplementary table 12:** Sensitivity analysis describing the ICD-10 diagnoses (first episode, first diagnostic position) of non-AMI HES cases that are within  $\pm 30$  days of MINAP only AMI cases from the main analyses

### Supplementary figures

**Supplementary figure 1:** Flow diagram illustrating the NCKDA extracts, and resulting contribution of AMI events to this study

**Supplementary figure 2:** AMI case ascertainment in MINAP and HES datasets over time.

**Supplementary figure 3:** Bland-Altman plot comparing the mean eGFR (NCKDA eGFR and MINAP eGFR, x-axis) and the difference between the NCKDA eGFR and the MINAP eGFR (y-axis).

**Supplementary figure 4:** AMI hospitalisations occurring before study start - comparing AMI case ascertainment overall and by CKD status for AMI hospitalisations in the main analysis and AMI hospitalisations which occurred prior to the last NCKDA extract (sensitivity analysis).

**Supplementary figure 5:** Sensitivity analyses compared to main analysis, describing AMI recording in MINAP and HES in the overall study population at risk of or with CKD. Areas of Venn diagrams are proportional to the number of cases.

**Supplementary table 1:** ICD-10 codes for AMI identified in HES

<b>AMI subtype</b>	<b>ICD-10 codes</b>
Overall	I21, I22, I23
STEMI	I21.0, I21.1, I21.2, I21.3, I22.0, I22.1, I22.8
NSTEMI	I21.4, I21.9, I22.9
Missing	I23

AMI: acute myocardial infarction; HES: Hospital Episode Statistics; ICD-10: International Classification of Diseases 10<sup>th</sup> Edition; STEMI: ST elevated myocardial infarction; NSTEMI: Non-ST elevated myocardial infarction

**Supplementary table 2:** CALIBER definition of AMI subtypes (STEMI, NSTEMI) using MINAP data.

AMI subtype	MINAP variable		
	Discharge diagnosis	Markers elevated?	ECG result
Other	Threatened MI, Chest pain uncertain cause, MI unconfirmed, other diagnosis	-	-
STEMI	STEMI	Raised or missing	ST elevation, LBBB, or ST elevation
	NSTEMI/Troponin positive ACS	Raised or missing	ST elevation
	ACS troponin negative	Raised	ST elevation
	ACS troponin unspecified	Raised	ST elevation
NSTEMI	NSTEMI/Troponin positive ACS	Raised or missing	ST depression, T wave changes only, other abnormality, Normal ECG, or LBBB
	ACS troponin negative	Raised	LBBB, ST depression, T wave changes only, Other abnormality, normal ECG, or missing
	ACS troponin unspecified	Raised	LBBB, ST depression, T wave changes only, Other abnormality, normal ECG, or missing
Unstable angina	*Any remaining hospitalisations not assigned as STEMI, NSTEMI, or other diagnosis		

ACS: acute coronary syndrome, AMI: acute myocardial infarction, ECG: electrocardiogram, LBBB: left bundle branch block, MI: myocardial infarction, MINAP: Myocardial Ischaemia National Audit Project, NSTEMI: Non ST-elevation myocardial infarction, STEMI: ST-elevation myocardial infarction

**Supplementary table 3:** Variables used to define death in-hospital and post-AMI discharge.

<b>Data source</b>	<b>Variables to define in-hospital death</b>	<b>Variables to define death post-AMI discharge (in those who survive first AMI hospitalization)</b>
ONS	Date of death (falling on or in between first AMI admission and discharge dates)	Date of death (falling after first AMI discharge date)
MINAP	Reason for no angiography, no intervention, admission ward, discharge destination	-
HES	Discharge location, discharge method	-

AMI: acute myocardial infarction, HES: Hospital Episode Statistics, MINAP: Myocardial Ischaemia National Audit Project, ONS: Office of National Statistics

**Supplementary table 4:** Details on data sources for covariates.

Category	Covariate	Data source
Sociodemographic and lifestyle variables	Age at AMI admission	NCKDA
	Sex	NCKDA
	IMD quintiles	NCKDA
	Smoking status	NCKDA, MINAP
Comorbidities	Angina	MINAP and HES
	Cerebrovascular disease	MINAP and HES
	COPD	MINAP and HES
	Diabetes mellitus	MINAP and HES
	Heart failure	MINAP and HES
	Hypertension	NCKDA, MINAP, and HES
	Previous myocardial infarction	MINAP, and HES
	Peripheral vascular disease	NCKDA, MINAP, and HES
	Dialysis	NCKDA
Kidney transplant	NCKDA	

AMI: Acute Myocardial Infarction, COPD: Chronic Obstructive Pulmonary Disease, HES: Hospital Episode Statistics, IMD: Index of Multiple Deprivation, NCKDA: National Chronic Kidney Disease Audit, MINAP: Myocardial Ischaemia National Audit Project

**Supplementary table 5:** AMI database capture by CKD status (binary) stratified by AMI subtype (STEMI or NSTEMI)

AMI subtype	Database (outcome, compared to people with AMI recorded in MINAP & HES)	CKD stage (exposure)	Number of AMI admissions	Unadjusted RRR (95% CI)	Adjusted RRR <sup>1</sup> (95% CI)
STEMI	MINAP only (N=115)	At risk of CKD & Stages 1-2	31	1	1
		Stage 3a-5	74	1.08 (0.68-1.72)	0.88 (0.52-1.49)
	HES only (N=1,482)	At risk of CKD & Stages 1-2	1,306	1	1
		Stage 3a-5	194	0.07 (0.05-0.09)	0.07 (0.05-0.09)
NSTEMI	MINAP only (N=666)	At risk of CKD & Stages 1-2	167	1	1
		Stage 3a-5	474	1.16 (0.93-1.45)	1.11 (0.88-1.41)
	HES only (N=2,834)	At risk of CKD & Stages 1-2	2,164	1	1
		Stage 3a-5	717	0.14 (0.12-0.16)	0.15 (0.12-0.17)

<sup>1</sup> adjusted for sex, age group at AMI admission, ethnicity, previous AMI, and clustering by patient

AMI: Acute Myocardial Infarction, CKD: chronic kidney disease, HES: Hospital Episode Statistics, MINAP: Myocardial Ischaemia National Audit Project, NSTEMI: non-ST elevation myocardial infarction, RRR: relative risk ratio, STEMI: ST-elevation myocardial infarction

**Supplementary table 6:** Serum creatinine (SCr) measured in the first 24 hours of AMI hospitalization recorded in MINAP, stratified by CKD stage defined in primary care (NCKDA)

CKD status (NCKDA)	SCr recorded in MINAP at AMI admission, n (%)	MINAP median SCr, umol (IQR)	MINAP Median SCr value*, mg/dL (IQR)	MINAP Median eGFR, mL/min/1.73m <sup>2</sup> (IQR)
All stages	2,240 (97)	115 (91-152)	1.30 (1.03-1.72)	47.6 (33.5-61.6)
At risk of CKD & Stages 1-2	630 (97)	88 (74-104)	1.00 (0.84-1.18)	67.0 (56.0-80.2)
3a	770 (97)	109 (94-128)	1.23 (1.06-1.45)	50.8 (41.9-59.2)
3b	587 (98)	140 (117-174)	1.58 (1.32-1.97)	36.7 (29.4-43.4)
4-5	253 (95)	255 (190-407)	2.88 (2.15-4.60)	19.8 (12.0-25.5)

\*Multiplied by 0.95 for SCr taken before 2013

AMI: acute myocardial infarction, CKD: chronic kidney disease, eGFR: estimated glomerular filtration rate, NCKDA: National Chronic Kidney Disease Audit, MINAP: Myocardial Ischaemia National Audit Project, SCr: serum creatinine

**Supplementary table 7:** AMI hospitalisations occurring before study start – description of people in the NCKDA who experienced AMI hospitalisation recorded in MINAP or HES before the study start. n (column %) unless specified otherwise.
