

External validation of the ProVent score for prognostication of 1-year mortality of critically ill patients with prolonged mechanical ventilation: a retrospective observational study

Additional File 1: Kaplan Meier Plot demonstrating mortality up to 1 year after 21 days of invasive mechanical ventilation stratified by ProVent score. Higher ProVent scores are associated with higher mortality.

ProVent=0	95	89	88	82	82	82	81
ProVent=1	175	151	139	136	132	131	128
ProVent=2	252	172	150	135	124	115	109
ProVent=3	160	94	76	69	63	60	55
ProVent=4	81	32	25	25	24	23	23
ProVent=5	17	6	5	5	4	4	4
