

Figure S1: a. Schematic representation of the genotypic interaction analysis of PARK2 gene regulatory region SNPs rs9365492 and rs9355403 with the SNPs of genes providing Risk toward the Leprosy. Genotypes/Alleles in red color represent risk. **b.** Schematic representation of the genotypic interaction analysis of PARK2 gene regulatory region SNPs; rs9365492 and rs9355403 with the SNPs of gene providing Protection towards the Leprosy. Genotypes/Alleles in red color represent risk.
